

BP Connect  
Galena Blvd. and Constitution Drive, Aurora, Illinois

Client: BP  
Architect: WD Partners  
Role: General Contractor

As is the typical general contractor role, ICI's responsibility included supervising and coordinating the various trades necessary for the construction of a retail establishment. However, in the case of BP, ICI's involvement also included responsibility for coordinating a multitude of owner-contracted vendors.

This 4,200 SF, stick-built station includes a Wild Bean Cafe and convenience store. The 60,000 SF site has 10 dispensers and a car wash.

The selection of BP general contractors is based upon stringent criteria which includes the ability to conduct and maintain the rigorous BP "Golden Rules

of Safety" training program. As part of this program, every worker on the job must complete a 4-hour safety training before being allowed on the project site. Three ICI employees were trained, not only in the safety program, but also in administering the training.

According to Larry Gallagher, former HSSE Manager, "I am very pleased with the positive difference you are making in your site with regard to safety. It is obvious that you are on top of the details . . . Overall, site safety was very good. And you indicated that you have some ideas where improvement could be made . . . which is both refreshing and encouraging . . ."

## BP Connect Soda Stations Illinois, Indiana and Wisconsin

Client: BP  
Architect: BP Global Alliance  
Role: General Contractor

Chosen to renovate 49 BP soda stations, ICI completed each renovation within 1-2 days while the stores were fully operational.

Renovations took place as far north as Pleasant Prairie, Wisconsin; as far southeast as Dyer, Indiana; and as far west as Oswego, Illinois. Work included:

- Removal of existing ice makers and the installation of new Scotsman ice makers for "crunch" nugget ice and Manitowoc ice makers for cubed ice.
- New Lancer Frozen Beverage Dispensers were installed to provide flavored frozen ice beverages.

- Existing cabinets were removed and replaced with IMPRESSIONS hand-crafted cabinetry.
- Twenty-valve ice beverage dispensers with internal carbonation replaced existing beverage dispensers.
- New 95" wide, trac-hinged signage with gas springs was installed. The perimeter of each interior was painted with Zolatone environmentally safe and LEED compliant finishes.

ICI employees not only completed a 4-hour safety program, but also were trained to administer safety training where appropriate.
