

Broadview Baptist Church Addition
2111 South 17th Avenue, Broadview, Illinois

Client: Broadview Baptist Church
Architect: Barnett & Associates
Role: General Contractor

International Contractors, Inc. was awarded the general contract to turn this single story church into a two-level building.

In order to add the second floor, ICI removed the first floor roof and installed new structural steel and a new roofing system. The second floor was then constructed. Upon completion of the second floor, International Contractors renovated existing space within the church into a nursery, multi-purpose room and video/media room.

Construction took place during the winter months, so ICI had to be aware of the weather conditions and how it would effect the team, the materials and the church employees and congregation members.

The church maintained operations while construction was underway. To avoid disruption careful consideration was given to every aspect of the construction process.
