

Sacred Heart Parish Center
326 West Maple Street, Lombard, Illinois

Client: Sacred Heart Church
Architect: Legat Architects
Role: General Contractor

This 13,670 SF Parish Center, constructed of masonry and precast, boasts a large vaulted ceiling located in the entrance lobby. The addition, which has a joint corridor to the existing school, includes a gymnasium/multipurpose room, locker rooms, a kitchen, an office, storage areas and a meeting room that can be divided into three separate rooms if necessary.

Special conditions were addressed during construction, including the removal and replacement of an existing electrical/phone/fire duct that ran across and into the foundation of the new building.

Also discovered was a water and sanitation line that required relocation. The entire team worked together to solve these issues within one day, per code requirement.

Safety is always an important issue on all ICI job sites. ICI strives to minimize the disruption caused by projects. During the summertime, ICI completed the exterior and roof joist so the site would be enclosed in time for the first day of school.
