

Tommy Hilfiger
One South State Street, Chicago, Illinois

Client: Commercial Concepts, Inc.
Architect: Pointe Design Group
Role: Construction Manager

When the hosiery department of Carson Pirie Scott was to become the new Tommy Hilfiger store, ICI was called upon to renovate 4,000 SF of the department store, inside and out.

While the adjacent components of Carson Pirie Scott were open for business as usual, ICI completed the work in just eight weeks. Extraordinary millwork; flooring which is a combination of marble and hardwood; and 350 directional "can" lights strategically placed in dry-wall ceiling and within wall recessions make this project particularly unique.

The renovation additionally required a new store front by ICI to compli-

ment the new interior. Because of the significance of this project in this location, a grand opening was held with an appearance by Tommy Hilfiger.

According to John E. Helms, president of Commercial Concepts, Inc., "I just wanted to drop you a line and compliment you and your staff on the excellent job that you did on this project. It is my understanding that all the people from Tommy Hilfiger are very pleased with the quality of work and I know they were pleased with the team of people we had working on the job."
