

University of Illinois at Chicago
Chicago, IL

Client: Office of Capital Programs
Architect: Pavilion: Valerio Dewalt Train Associates
Clinical Sciences: John Victor Frega Associates, Ltd.
Warman Olsen Warman, Ltd.
Role: General Contractor

University of Illinois at Chicago Pavilion

International Contractors, Inc. constructed a 3,200 SF addition to the existing University of Illinois Pavilion, which houses the University's sporting events and special entertainment.

The new addition included the construction of general offices and on-site sales booths.

University of Illinois at Chicago Clinical Sciences

International Contractors, Inc. was contracted for extensive remodeling of existing hospital space, including the pharmacy and infectious disease areas.

This project required demolition of existing walls, ductwork and electrical piping, and new plumbing fixtures.

The University of Illinois Clinical Sciences remained occupied as the remodeling progressed. ICI worked in small areas at any one time in order to avoid disruption.

Our supervisory personnel continually worked with the Owner's Representative to coordinate the work. Dust control, contamination protection and clean up were major responsibilities handled by our team on a daily basis.
